

9-10 March, we held a coordination workshop in Kaya.

The aim of the meeting was to reach a consensus on some issues of Susfish, to have the same understandings and to plan our activities. It was a great opportunity for Susfish scientists of Burkina to visit the natural Lake Dem, 15 km far from the city of Kaya. It is similar to Lake Bam, one of our study sites which is 35 km far away.

		
<p>An irrigation canal, lake Dem</p>	<p>Matter of discussion came into light on the lake banks.</p>	<p>The 2 female partners took part in the workshop: the accountant (holding a piece of wood) and the gender expert</p>
		
<p>A disappearing type of canoe still existing in Lake Dem</p>	<p>Scientist observing some landings of fish in Dem</p>	<p>The water of Dem is pumped (on the right hand side) for use in the city of Kaya, 15 km away.</p>
